A Century of Service . . . What Brown Does For You

Brown Engineering has been supplying local industry with power transmission products, fluid power components, lubricants, and lubrication equipment for over 100 years. We have the experience, the know-how, and the facilities to provide a variety of value added services such as product modification and assembly, custom machined parts, industrial hose assemblies, hydraulic hose assemblies, kitting, lubrication surveys, free lube analysis, conveyor belt surveys, belt drive design & energy surveys, automatic lube system design, sling inspections, and product training schools.

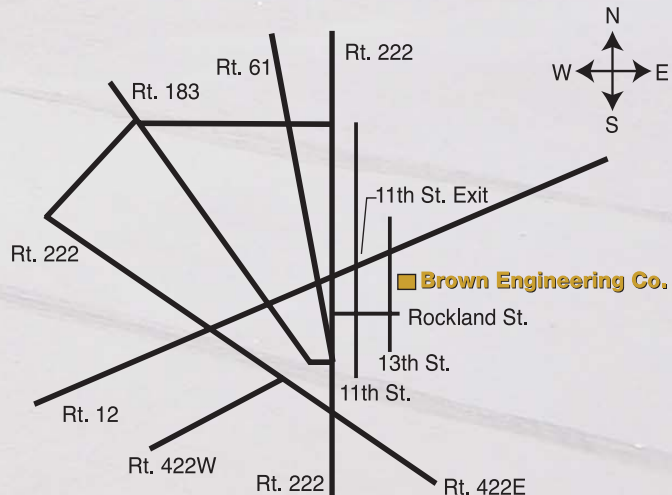

We do more than take orders and provide catalogs. Our experienced field personnel are well versed at identifying parts and components and cross referencing obsolete items.
